Summary

Results-driven Full-Stack Developer and AI/ML Engineer fluent in Java, Python, JavaScript, and the MERN stack, with a proven ability to ship intelligent, production-ready systems. Built real-time AI applications—including a 90%+ accuracy confusion detection engine and a smart fleet intelligence platform—demonstrating end-to-end ownership from model training to frontend deployment. Armed with 350+ DSA solutions, multiple HackerRank certifications, and active industry exposure through Infosys Springboard, I bring both the technical depth and the execution mindset to tackle complex engineering challenges from day one.

Experience

Software Development Intern (Virtual)

Jan 2025 – March 2026

Infosys Springboard Virtual Internship 6.0

- Engineered 15+ Java programs using Core Java, OOP, and DSA principles to solve real-world algorithmic problems.
- Reduced code defects by adhering to SDLC best practices and clean coding standards across all deliverables.
- Maintained 100% commit consistency on Git/GitHub, enabling structured version control across 3+ project modules.

Intern – Blockchain, Big Data & Data Science

June 2024

NIELIT Kolkata

- Completed 40-hour certified training in Blockchain architecture, Big Data processing, and distributed systems.
- Acquired hands-on experience in data pipeline workflows, applying concepts across 2 practical case studies.

Projects

Super Vision – AI-Based Confusion Detection System

Python, OpenCV, React, Node.js

Delivered a real-time facial confusion detection engine achieving 90%+ accuracy across 5 expression categories, with ML models served via RESTful APIs and a React/Node.js frontend, cutting detection latency by 30%.

NeuroFleetX – Smart Fleet & Traffic Intelligence Platform

Java Spring Boot, React 19, MySQL

Shipped a modular fleet monitoring platform tracking 100+ vehicle units in real-time, with an optimized MySQL schema that reduced average query response time by 40%.

Education

B.Tech – Artificial Intelligence and Machine Learning

2022 – 2026

Netaji Subhash Engineering College, Kolkata, WB-700152

Technical Skills

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Web Technologies:** MERN Stack (MongoDB, Express.js, React.js, Node.js), HTML5, CSS3
- **Frameworks & Databases:** Java Spring Boot, MySQL, MongoDB
- **AI/ML & Tools:** TensorFlow, Pandas, OpenCV, MATLAB, Git, GitHub
- **Core Competencies:** Data Structures & Algorithms, Object-Oriented Programming, DBMS

Certifications

- Machine Learning – Udemy
- Smart Automation through IoT – AILABS
- Blockchain Bootcamp – NIELIT
- Data Visualization using MATLAB
- Deloitte Australia – Cyber Job Simulation (Forage)

Achievements

- Solved 350+ DSA challenges on LeetCode & GeeksforGeeks; earned 4 HackerRank certifications in Java, Python, and SQL.
- Ranked top 30% in AnaVerse 2.0_N Kaggle competition, optimizing anomaly detection models.
